

ImmuCell

Manufacturing Associate

Description

This position is with ImmuCell's Liquid Processing team. Responsibilities include: large-scale whey processing, cleaning and sanitization of process equipment, liquid filtration, documentation and some reagent preparation.

Job Requirements

An appropriate candidate should have experience/knowledge in: liquid processing, large-scale filtration, food/beverage, pharmaceutical and/or fermentation processing, USDA/cGMP documentation, general laboratory practices, forklift training and basic math/computer skills. Job requires lifting of heavy materials and full day on production floor with limited desk time. Effective verbal and written communication and attention to detail are a must. Good decision making, time management skills and the ability to multi-task are necessary. The appropriate candidate should be willing to work Wednesday-Sunday with some overtime expected.

Benefits

Competitive salary, health insurance, 401k, vacation and stock options.

Education Requirements

High school diploma or equivalent.
