

Temporary Data Analyst – Life Sciences Industry Report

BioME is seeking a graduate student enrolled in a Maine institution to gather and analyze data for the 2021 Life Sciences Industry Report focusing on employment, earnings, economic impact, funding sources, higher education, and other important aspects of the industry. The report will be structured similarly to the [2019 Industry Report](#), and will include a section on COVID impact.

The successful candidate will turn data into information that will offer a complete picture of this fast-moving sector of Maine's economy and show areas of strength and opportunities for growth. The report will be distributed to BioME members, Maine's life sciences community, Maine State Legislators, investors, and more.

JOB DETAILS

Project Salary: \$5,000

Job Type: Temporary / Contract

Location: Maine / Remote

Timeframe: July 15, 2021 – September 30, 2021

RESPONSIBILITIES

- ◇ Research and determine the appropriate data-sources and methodology for data collection and interpretation
- ◇ Collect and interpret a variety of data related to jobs and earnings; investment in the industry
- ◇ Identify and analyze data necessary for report
- ◇ Review data for quality and accuracy
- ◇ Prepare presentations of narrative findings (overview of what the data is telling us and why this is significant) and sources (explaining where the data came from and methodology)
