

ImmuCell

Vaccine Manufacturing Associate

ImmuCell Corporation seeks an individual with previous biotech and analytical experience to join our animal health vaccine production team. Required and preferred skills are listed below.

- Required professional skills:
 - Aseptic training on good technique to prevent contamination
 - Strict adherence to written SOPs
 - Ability to effectively and independently manage multiple and often concurrent processing steps
 - Analysis of results – chemical and microbiological assays and steps
 - Basic computer skills
 - Good organizational and documentation practices
 - Experience working in a cGMP environment
 - Ability to effectively work on a process independently and within a small team structure

- Preferred professional skills:
 - Experience with mammalian/insect cell culture in vitro
 - Fermentation
 - Chromatography purification
 - Centrifugation

- Educational requirements:
 - B.S. in Microbiology, Biology or related field

The ideal candidate will be self-motivated, having the ability to work well within a team environment as well as interface between other departments. This position will report to the Vaccine Production Manager. ImmuCell Corporation provides a range of benefits from paid vacation and holidays, health and dental insurance and 401K with company match.
