Bioscience Association of Maine presents:

ME BIOSCIENCE DAY

November 13-17, 2023

#mebioscienceday

What is ME Bioscience Day?

ME Bioscience Day is a statewide event that aims to get middle school students excited about science and inform them of the opportunities they might have working in a science related field in their future. Traditionally, professionals volunteer to visit local middle school classrooms to talk with students about their career in science, their daily tasks, and the opportunities that are available in science based careers. In 2022, we reached over 6,700 students from 46 schools across Maine!

How will the event be held in 2023?

In 2023, we will be hosting ME Bioscience Day as a hybrid event with both in-person volunteers and virtual video formats. We are coordinating both volunteer visits to local middle schools along with producing a video in lieu of live presentations.

If you are unable to volunteer, but would still like to be involved, we encourage you to become a 2023 ME Bioscience Day Supporter! Sponsorships allow us to reach more schools and provide materials for hands-on activities. Your logo will be displayed to thousands of middle school students and their teachers across the state.

Sponsorship Benefits

- Recognition as ME Bioscience Day 2023 official corporate partner
- Logo recognition in final slide in ME Bioscience Day video (shown to thousands of middle school students and teachers)
- Logo recognition in social media posts
- Logo recognition on the website
